

## HEART-PLAY Supplement Study

Are you a UCSD Cardiology patient, being treated for one of the following medical conditions?

- myocardial infarction
- coronary artery bypass surgery
- stable angina
- heart valve repair or replacement,
- coronary angioplasty or stenting
- congestive heart failure, including pre-symptomatic heart failure

Please consider participating in our research study, led by Drs. Paul Mills, Pam Taub, and Ryan Bradley to help UCSD researchers learn more about nutritional supplementation and cardiovascular disease.

Earn up to \$50 for a single testing visit, including blood draw, health interview, questionnaires, and measurements of your balance, posture, and ability to walk a short distance.

(858) 534-3495
